Re: Postal Support Employees

Don-Mike:

I have received inquiries from several Postal Support Employees (PSEs) in regards to the many hours and consecutive days they have been working, many of them for several months. They are being told that this is the lightest mail volume time yet they are still scheduled 6 days per week. Of course, there are probably many Postal Support Employees that would prefer to work 6 days per week, but there are many that would like to have a couple of off days on occasion. What seems odd is that after the USPS implemented the Function 1 Scheduler program, which basically reduced the number of employees working specific Tours and operations, the work-hours have increased substantially. I would like to discuss this at your earliest convenience.

If you have any questions and/or concerns, please feel free to contact me anytime.

Sincerely,

A handwritten signature in black ink that reads "Joe Paul".
