Orlando P&DC

Re: AMF Radio

Don:

It has been brought to my attention that there is no radio located in the AMF facility adjacent to the Orlando P&DC that the employees could utilize in the case of an emergency. Employees have expressed concerns, which I have just been alerted to, that this has been a problem for close to a year. Apparently, all of the Tour 3 supervisors, to include MDO Greg Curtis, have had this concern brought to their attention, but nothing seems to have been done about it.

The employees do say that they call extension #215, but it is a rarity that that phone gets answered, and if and when it does, it is simply too long, which in case of an emergency, could be the difference between life and death. We are asking that some sort of a radio system be set in place so that there are no issues safety-wise going forward. Providing some sort of a radio is quite a minor adjustment in light of the possible negative consequences of what could happen in case of an emergency.

I look forward to your soon response.

Sincerely,

A handwritten signature in black ink that reads "Joe Paul".

President
