Don Shandor
Plant Manager/A
Seminole P&DC

Don:

I was sent an inquiry this morning concerning the upcoming training for Electronic Technicians (ET) and Mail Processing Equipment Mechanics (MPE) relating to the changes to the APPS machinery in the Seminole P&DC. One of my APWU Officers stated that Tom Murphy, EAS, was not at work to be asked these questions, so he as well as others, are wondering who and how many employees are being authorized for this training. In the past, management in this facility authorized penalty pay overtime, if needed, to accommodate the training, especially in light of the fact that this equipment will be operational in the imminent future. I was told that the training will be from 7-11 am. This time-frame will be amenable for Tour 2, but the concern is for Tour 1.

Please let me know what the plan is so that I can inform the employees. Thank you in advance.

PS: I also sent a copy of this letter to Mike Willard.

Sincerely,

A handwritten signature in black ink that reads "Joe Paul".
